## Problem Statement

The lack of adequate toilet and wash area facilities in government schools is a pressing issue that demands immediate attention. This problem not only affects the overall hygiene and health of students but also hampers their ability to concentrate and learn effectively. In many government schools, the existing toilets are often poorly maintained, unclean, or insufficient in number, leading to unhygienic conditions that can contribute to the spread of diseases. Additionally, the absence of proper wash areas further exacerbates the problem, as students are unable to practice basic hygiene, like handwashing, which is crucial for disease prevention. Consequently, this dire situation not only jeopardizes the well-being of students but also impedes their access to quality education. Addressing this issue should be a top priority to ensure a safe and conducive learning environment for all students in government schools.

### Conditions in Government Schools

- Lack of cleaning and running water for cleaning the sanitation facilities
- Lack of access to Drinking Water and Hand Wash Stations for the students
- Unhygienic and non-functional Sanitation Infrastructure
- Dull Classroom Interior – like fading wall paint and broken benches.

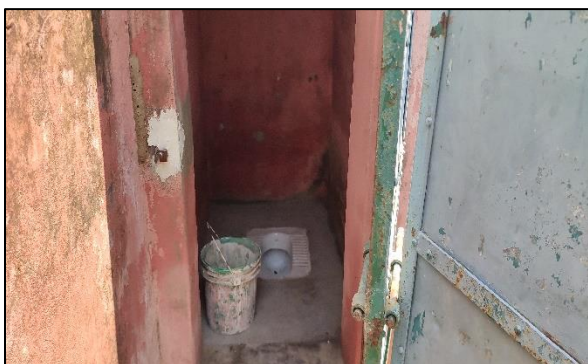

## Project Deliverables

- Boys Toilet
- Girls Toilet
- Borewell
- Carpet and Color Work

## TRANSFORMATION WITH- WASH FACILITIES

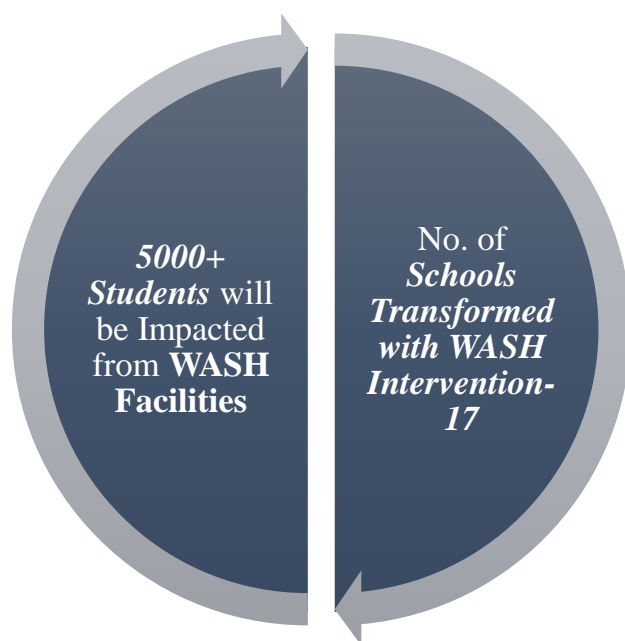

## IMPACT OF WASH FACILITIES

Properly maintained dishwash areas and toilets contribute to better hygiene standards in schools.

Access to clean and well-maintained toilets is a significant factor in student attendance and retention rates.

Access to clean water and sanitation facilities can also improve the working environment for teachers.

Well-designed sanitation facilities provide students with a sense of dignity and privacy.

We express our heartfelt gratitude to the entire team of **Mukul Madhav Foundation** for their initiative and impactful contribution in transforming the lives of numerous children.
